Three reels in the Kitchen Cut

His skeleton: a title card on top, you to camera, one fix in 40 seconds, big captions. Our cutting: two angles that swap every line, a freeze frame name card, smash cut inserts with one sound, time jumps, and a gold line that carries you to the app.

How to film

1. **Setup A.** Phone portrait at eye level, an arm's length away, window light in front of you. Read every **A** and **END** line, top to bottom.
2. **Setup B.** Move the phone closer and 45 degrees to one side, a little lower. Read every **B** line.
3. **One breath per line.** Pause two seconds between lines. Stumble? Say it again and carry on. The edit cuts the rest.
4. **Say nothing for INSERT and SCREEN lines.** Inserts come from the list on the last page; screens are added in the edit.
5. **The last line is always the same, word for word,** still and to camera.
6. **Send everything over.** Do not trim on the phone.

The badges

A Front, eye level *B* Close, side on *INSERT* Hands and objects

SCREEN App screen, added in the edit *END* Angle A, still, to camera

Never on camera: a child's face or name, a real child's screen, fear, a statistic as the hook. One fix per reel. The style is written down in STYLE.md so every reel after these looks the same.
