Pebble's Ice Cream Shop

Open your shop. Learn your coins.

A pretend play money game for ages 5 to 7, played with real UK coin values.

Welcome in! I am Pebble, I am six, and today YOU are running my shop. Grab the scoop!

Ages 5 to 7

Year 1 and Year 2 maths

Printable UK play coins

TEN MINUTES BEFORE THE SHOP OPENS

Set up the shop, then let the till do the teaching

SETUP · ABOUT TEN MINUTES

1. Print everything. Coins, cards and the shopkeeper kit come out best on card. A laminate on the menu and the coins keeps the shop open all summer.
2. Cut out the coins, the cones, scoops and toppings, and the twelve order cards.
3. Build the counter: menu propped against a cereal box, coins sorted into the till, teddies in the queue with a small pile of coins each.
4. Badge on, sign flipped to OPEN, and you join the queue.

GAME 1 · YEAR 1 MATHS

Pay the price

The customer orders one thing and pays with exactly the coins on the price. A single scoop is 20p, so a 20p coin crosses the counter. Say every coin's name out loud as it lands. That is the whole game, and it is Year 1 coin recognition doing its job.

GAME 2 · YEAR 2 MATHS

Make it another way

Now the till has no 20p coins left! Every order is paid with two or three coins that make the amount. A 45p double scoop becomes 20p, 20p and 5p. One amount, many ways: that is the Year 2 skill of combining coins.

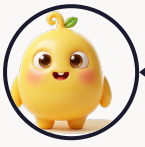

GAME 3 · YEAR 2 STRETCH

The change challenge

Customers get fancy and pay with 50p or £1. The shopkeeper counts the change back out loud, counting up from the price. A 20p scoop paid with 50p: "twenty... thirty, forty, fifty. Your change is 30p!"

THE GOLDEN TIP

Let your child be the shopkeeper, not the customer. The one behind the till does the reaching, sorting, counting and handing back, and the handling is where the learning lives. Your job is to be the fussy customer who orders wrong, pays with the wrong coin and needs correcting. Being put right by a six year old is the whole point.

My rule: the shopkeeper touches every coin. If a grown up starts counting for you, they go to the back of the queue.

Curriculum note for the grown ups: Game 1 practises Year 1 maths, recognising coins and their values. Games 2 and 3 practise Year 2 maths, making amounts from combinations of coins and giving change.

PEBBLE'S ICE CREAM SHOP

EVERY PRICE IS COIN PRACTICE

Single scoop — 20p

ONE COIN PAYS IT

Double scoop — 45p

20P + 20P + 5P

Triple scoop — 70p

50P + 20P

Ice lolly — 55p

50P + 5P

Super sundae — £1.20

£1 + 20P

Family tub — £2.50

£2 + 50P

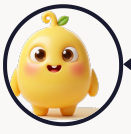

Chocolate flake — 15p

Strawberry sauce — 10p

Rainbow sprinkles — 5p

What would you like today? I always pick strawberry with a flake!

Laminate me. A menu that survives sticky fingers and a splash of squash runs the whole summer. Prop me against a cereal box.
