Count to 20 with me

Number cards 1 to 20 and a counting mat, made with Sofia.

Ages 4 to 7

Cut out and play

Numbers 1 to 20

Count the dots, find the number, and cheer out loud.
Every number has a friend to match it.

TWO MINUTES BEFORE YOU PRINT

How to play, and the grown up guide

Hello, little counter. I am Sofia and I love numbers. We are going to count all the way to twenty together. Touch each dot as you say its number out loud, one touch for one dot. When you know how many, find the number that matches. You have got this, and I am right here with you.

SETTING IT UP

Print the pages and go. Cut out the twenty number cards along the lines. Laminate them if you can, so they last and last. Buttons, pasta or coins make lovely counters for the counting mat.

HOW THE COUNTING WORKS

Each card shows a big number and the same amount of dots. Count the dots to see what the number means. Twenty cards, twenty amounts, from one all the way up to twenty.

GROWN UP GUIDE · COUNTING ONE TO ONE

Point and say together. The big idea at this age is one to one counting, one number word for one object, with no skipping and no doubling up. Move a finger onto each dot as your child says the number. Then ask the magic question, **how many altogether?** The last number they say is the total. That is the link between a number and an amount, and it is the whole game.

THREE GENTLE STEPS

One · Count the dots on a card, touching each one.

Two · Look at the big number. That is how many there were.

Three · Say it proudly, then find something at home to count the same way.

Praise the trying, not just the right answer. If a count goes wrong, smile and say let us count again together. Slow and happy beats fast and worried every time.
