TWO MINUTES BEFORE YOU PLAY

How to play, and a note for grown ups

BEEP BOOP! Hello little one. I am DiGi. Print the fish and pop them out. Then find the bowl that is the same colour as each fish. Red fish to the red bowl, blue fish to the blue bowl. Say the colour out loud with me as you go. Ready? Let us splash!

SETTING IT UP

Print the pages and cut out the fish along the dashed lines. Big scissors for grown up hands. Laminate the fish and the bowls if you want them to last, then play again and again. Nothing else to buy.

HOW TO PLAY

Spread the six bowls out. Give your child one fish at a time. Name the colour together, then find the bowl that matches. When every fish is home, the tank is full and the colours are sorted.

A NOTE FOR GROWN UPS

Colour is one of the very first sorting skills. Before children can count or read, they group the world by what looks the same. Matching a red fish to a red bowl is real early maths, quietly at work. Play alongside your child rather than testing them. Name each colour out loud, go slow, and let them place the fish themselves. If a fish lands in the wrong bowl, that is part of learning. Just say the colour again warmly and try together. Celebrate the match, not the speed.

THE SIX COLOURS IN THIS PACK

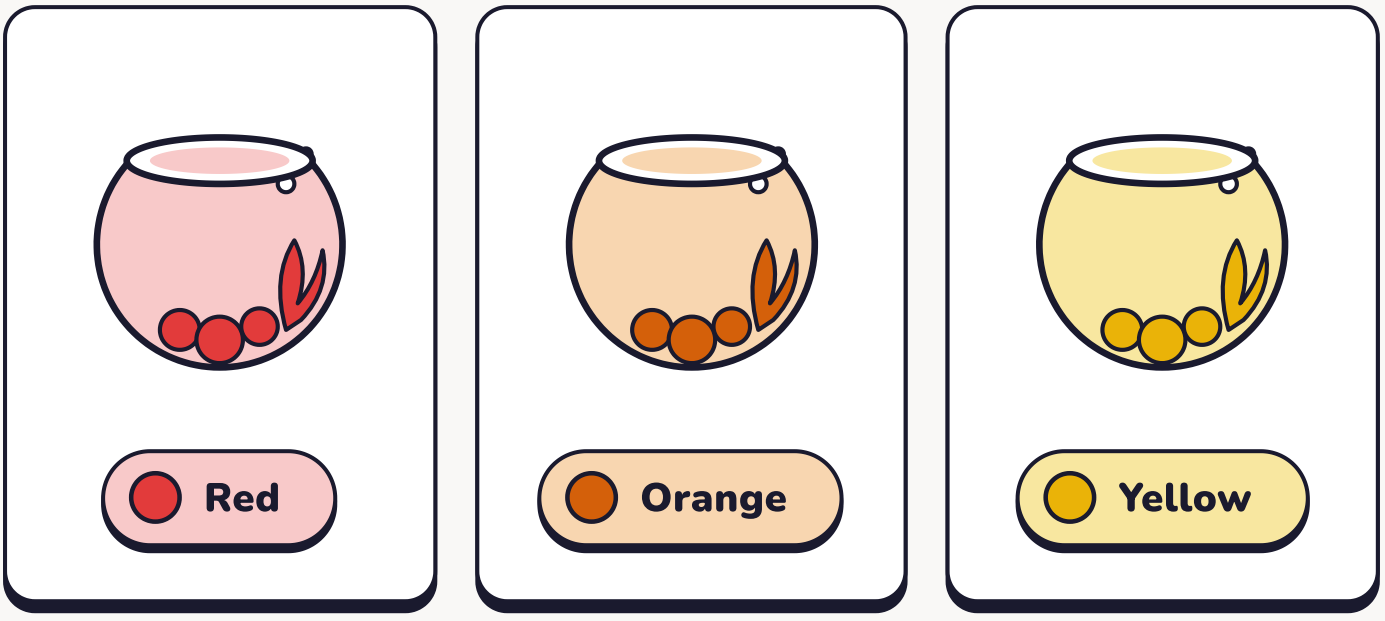

Red · Orange · Yellow · Green · Blue · Pink

Line up the bowls

Set these bowls out where your child can reach them. Each bowl has one colour and its name. Match every fish to the bowl of the same colour.
